

Table of Contents

Guidance: The EMS manual is prepared as three-tire documents with cross references to enable integrating it with other manuals like quality manual (ISO 9000) and safety manual (OHSAS 18001). Once to complete editing all parts (sections) of the manual, update “Number of Pages” in the table below and revision date in footer.

EMS Manual may not require lot of changes but level 2 documents; procedure, reference documents and Level 3 forms will require lot of customization.

Also delete this guidance from all pages.

Section No.	Title	No. of Pages
1.1	Table of Contents	1
